PROFILE

My expertise is transforming ideas into a ready-to-market digital product. I have 5+ years experience in building web app for startups using javascript stack such as react, node JS, and others.

EMPLOYMENT HISTORY

React Programmer, Garuda Robotics

Singapore

Jan 2020 — Present

I build the frontend and the backend of UATO web app (<https://fly.uato.sg>). This web manages drone class schedule management, build using react, node JS, and mongoDB. I also integrate Stripe API into Garuda Robotics product lines such as Garuda Plex and UATO.

Fullstack Web Programmer, Soalnya.id

Bandung

Mar 2019 — Jan 2020

I build e-learning for test preparation platform. This web uses react, node js, and mongoDB and being accessed by more than 1200 weekly active users.

Web Programmer, Threetag

Bandung

Dec 2011 — Dec 2017

My job is to build a website following client's requirement. Most of my work involve wordpress such as creating a wordpress template, creating a custom plugin for wordpress.
